## Volition Granted Four Additional Patents

ISNES, Belgium, Sept. 14, 2017 /PRNewswire/ -- VolitionRx Limited (NYSE AMERICAN: VNRX) ("Volition") today announced that it has been granted four additional patents relating to its proprietary Nu.Q™ platform. The newly-issued patents further strengthen Volition's intellectual property portfolio worldwide.

Dr. Jake Micallef, Chief Scientific Officer of Volition, commented, "Our worldwide portfolio of granted patents that protects various aspects of Volition's Nu.Q™ technology is growing. These most recent patents further solidify our market position in blood tests for circulating chromosome fragments from dead cancer cells and we continue to apply for additional patents in this area."

Cameron Reynolds, Chief Executive Officer of Volition, added, "The granting of these patents is excellent news. It reconfirms the novelty of Volition's technology and will further protect Volition commercially as we progress towards commercialization of the platform."

The granted patents include:

- US 9,709,569, Method for Detecting Nucleosome Adducts - granted in the U.S. on July 18, 2017
- EP 2788767, Method for Detecting Nucleosome Adducts - granted in Europe on September 6, 2017
- AU 2012300643, Method for Detecting Nucleosomes Containing Histone Variants - granted in Australia on June 15, 2017
- MX 349561, Method for Detecting Nucleosomes Containing Histone Variants - granted in Mexico on August 2, 2017

The patents are complementary to those previously granted. Volition now has 5 granted patents in the U.S. and 8 more patents in other territories.

### About Volition

Volition is a multi-national life sciences company developing simple, easy to use blood-based cancer tests to accurately diagnose a range of cancers. The tests are based on the science of Nucleosomics®, which is the practice of identifying and measuring nucleosomes in the bloodstream or other bodily fluid - an indication that disease is present.

As cancer screening programs become more widespread, Volition's products aim to help to diagnose a range of cancers quickly, simply, accurately and cost effectively. Early diagnosis has the potential to not only prolong the life of patients, but also to improve their quality of life.

Volition's research and development activities are currently centered in Belgium, with additional offices in London, Texas and Singapore, as the company focuses on bringing its

diagnostic products to market first in Europe, then in the U.S. and ultimately, worldwide.

## Safe Harbor Statement

Statements in this press release may be "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that concern matters that involve risks and uncertainties that could cause actual results to differ materially from those anticipated or projected in the forward-looking statements. Words such as "expects," "anticipates," "intends," "plans," "aims," "targets," "believes," "seeks," "estimates," "optimizing," "potential," "goal," "suggests," "could," "would," "should," "may," "will" and similar expressions identify forward-looking statements. These forward-looking statements relate to the effectiveness of Volition's bodily-fluid-based diagnostic tests as well as Volition's ability to develop and successfully commercialize such test platforms for early detection of cancer. Volition's actual results may differ materially from those indicated in these forward-looking statements due to numerous risks and uncertainties. For instance, if Volition fails to develop and commercialize diagnostic products, it may be unable to execute its plan of operations. Other risks and uncertainties include Volition's failure to obtain necessary regulatory clearances or approvals to distribute and market future products in the clinical IVD market; a failure by the marketplace to accept the products in Volition's development pipeline or any other diagnostic products Volition might develop; Volition will face fierce competition and Volition's intended products may become obsolete due to the highly competitive nature of the diagnostics market and its rapid technological change; and other risks identified in Volition's most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q, as well as other documents that Volition files with the Securities and Exchange Commission. These statements are based on current expectations, estimates and projections about Volition's business based, in part, on assumptions made by management. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. Forward-looking statements are made as of the date of this release, and, except as required by law, Volition does not undertake an obligation to update its forward-looking statements to

reflect future events or circumstances.
