VolitionRx Limited Releases Video Featuring Interviews with its Scientific Advisory Board

ISNES, Belgium, Sept. 26 2018 /PRNewswire/ -- VolitionRx Limited (NYSE American: VNRX) ("Volition") today released a video featuring members of its Scientific Advisory Board (SAB). The video was taken at Volition's laboratories in Belgium during the last SAB meeting and features members of the SAB discussing their involvement with Volition and support of its mission to significantly improve cancer diagnostics.

The SAB is a multi-disciplinary international board with expertise in broad areas of technology and convenes at least twice a year to give high level advice and counsel to Volition's scientific team. Chaired by Dr. Alan Colman, the Board has seven other members, all highly-respected leading experts in their individual fields.

Dr. Colman commented "The role of the SAB is to review and advise the Volition team on the development of its scientific program. Every member provides invaluable insight and input which helps drive scientific rigour."

About Volition

Volition is a multi-national life sciences company focused on developing simple, easy to use, cost effective blood tests designed to help diagnose a range of cancers. The tests are based on the technology platform of Nucleosomics[®], which is the practice of identifying and measuring nucleosomes in the bloodstream or other bodily fluid - an indication that disease

is present.

As cancer screening programs become more widespread, Volition's products aim to help to diagnose a range of cancers quickly, simply, accurately and cost effectively. Early diagnosis has the potential to not only prolong the life of patients, but also to improve their quality of life.

Volition intends to expand the application of its technology beyond cancer by exploring other disease applications. The company's research and development activities are currently centered in Belgium, with additional offices in London, Texas and Singapore, as it focuses on bringing its diagnostic products to market first in Europe, then in the U.S. and ultimately, worldwide.
