VolitionRx Schedules Full-Year 2015 Earnings Conference Call and Business Update for Friday, March 11, 2016 at 8:30am ET

NAMUR, Belgium, March 9, 2016 /PRNewswire/ -- [VolitionRx Limited](#) (NYSE MKT: VNRX), a life sciences company focused on developing blood-based diagnostic tests for a broad range of cancer types and other conditions, today announced that, in conjunction with the filing of its annual report on Form 10-K for the year ended December 31, 2015, it will host a conference call on March 11, 2016, at 8:30 a.m. United States Eastern Time.

Cameron Reynolds, Chief Executive Officer, will host the call and provide an update on recent developments, including details of the ongoing clinical trials of the Company's NuQ[®] blood-based diagnostic platform. To participate in the call, please dial 1-888-401-4669 (toll-free) in the U.S. and Canada, and 1-719-325-2448 (toll) internationally. The conference ID number for both is 5016468. A live audio webcast of the conference call will also be available via link on the investor relations page of VolitionRx's corporate website at <http://ir.volitionrx.com>.

After the live audio webcast, the event will remain archived on VolitionRx's website for one year. In addition, a telephone replay of the call will be available until March 25, 2016. The replay dial-in numbers are 1-877-870-5176 (toll-free) in the U.S. and Canada and 1-858-384-5517 (toll) internationally. Please use replay pin number 5016468.

About VolitionRx

VolitionRx is a life sciences company focused on developing blood-based diagnostic tests for different types of cancer. The NuQ[®] tests are based on the science of Nucleosomics[®] which is the practice of identifying and measuring nucleosomes in the bloodstream - an indication that cancer is present.

VolitionRx's goal is to make the tests as common and simple to use, for both patients and doctors, as existing diabetic and cholesterol blood tests. VolitionRx's research and development activities are currently centred in Belgium as the company focuses on bringing its diagnostic products to market first in Europe, then in the U.S. and ultimately, worldwide.
