## Volition Issues Business Review 2023

HENDERSON, Nev., Jan. 4, 2024 /PRNewswire/ -- VolitionRx Limited (NYSE AMERICAN: VNRX) ("Volition"), a multi-national epigenetics company, has issued a Business Review of 2023, outlining its key highlights from the past year.

Volition's major achievements in 2023 include:

- Launching the Nu.Q® Vet Cancer Test in some significant markets through several licensing, supply and/or distribution agreements.
- Establishing several agreements to further expand access to the Nu.Q® Vet Cancer Test on a worldwide basis in 2024.
- Driving a market access program for Nu.Q® NETs, working with Centers of Excellence globally to exemplify its clinical utility.
- Completing the Q-Sub process with the U.S. Food and Drug Administration, and establishing a clear regulatory pathway for Nu.Q® NETs.
- Announcing a breakthrough early cancer detection method.
- Continuing to strengthen our strategic patent portfolio.
- Scaling up its operations, in particular production capacity.

To find out more about these achievements, please read Volition's Business Review [here](#) or watch the video below.

Cameron Reynolds, President and Group Chief Executive Officer, said: "At Volition, we are dedicated to saving lives and improving outcomes for people and animals worldwide through

our novel epigenetics platform.

"We believe we made great progress in our mission throughout 2023 and have in place compelling plans to move forward in 2024."

Volition is developing simple, easy-to-use, cost-effective blood tests to help diagnose and monitor a range of life-altering diseases in both humans and animals. For more information about Volition's technology go to: [www.volition.com](http://www.volition.com)

## **About Volition**

Volition is a multi-national epigenetics company focused on advancing the science of epigenetics. Volition is dedicated to saving lives and improving outcomes for people and animals with life-altering diseases through earlier detection, as well as disease and treatment monitoring.

Through its subsidiaries, Volition is developing and commercializing simple, easy to use, cost-effective blood tests to help diagnose and monitor a range of diseases, including some cancers and diseases associated with NETosis, such as sepsis. Early diagnosis and monitoring have the potential to not only prolong the life of patients, but also improve their quality of life.

Volition's research and development activities are centered in Belgium, with an innovation laboratory and office in the U.S. and additional offices in London and Singapore.

## **Safe Harbor Statement**

Statements in this Business Review may be "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that concern matters that involve risks and uncertainties that could cause actual results to differ materially from those anticipated or projected in the forward-looking statements. Words such as "expects," "anticipates," "intends," "plans," "aims," "targets," "believes," "seeks," "estimates," "optimizing," "potential," "goal," "suggests," "could," "would," "should," "may," "will" and similar expressions identify forward-looking statements. These forward-looking statements relate to, among other topics, Volition's expectations related to the launch of product sales with Heska and other counterparties to agreements, the success of negotiations and the timing, completion and execution of term sheets and/or agreements with third parties regarding the licensing and distribution of Volition's products, the timing, completion, success and delivery of data from clinical studies, the potential uses, benefits and effectiveness of its Nucleosomics™ technology platform, including the Nu.Q® NETs test and the Nu.Q® Vet Cancer Test, and the timing and execution of Volition's strategy with the FDA. Volition's actual results may differ materially from those indicated in these forward-looking statements due to numerous risks and

uncertainties, including, without limitation, results of studies testing the efficacy of its tests, a failure by the marketplace to accept Volition's Nu.Q® NETs test, Nu.Q® Vet Cancer Test or other products based on its Nucleosomics™ platform; Volition's failure to secure adequate intellectual property protection; Volition's failure to obtain necessary regulatory clearances or approvals to distribute and market future products; Volition will face fierce competition and its intended products may become obsolete due to the highly competitive nature of the diagnostics and disease monitoring markets and their rapid technological change; downturns in domestic and foreign economies; and other risks, including those identified in Volition's most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q, as well as other documents that Volition files with the Securities and Exchange Commission. For instance, if Volition fails to develop and commercialize diagnostic, prognostic or disease monitoring products, it may be unable to execute its plan of operations. Forward-looking statements are based on current expectations, estimates and projections about Volition's business based, in part, on assumptions made by management. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. Forward-looking statements are made as of the date of this Business Review, and, except as required by law, Volition does not undertake an obligation to update its forward-looking statements to reflect future events or circumstances.

Nucleosomics™ and Nu.Q® and their respective logos are trademarks and/or service marks of VolitionRx Limited and its subsidiaries. All other trademarks, service marks and trade names referred to in this Business Review are the property of their respective owners.
