"Inclusion in the Russell Indexes® is an important achievement for Volition. It is a testament to the significant progress we've made as a company over the past few years and we believe that membership will provide further visibility within the financial community and greater liquidity in our shares," stated Cameron Reynolds, Chief Executive Officer of Volition. "We look forward to introducing a wider investor audience to our platform and growth story, and to continuing to execute on our strategy in the second half of the year with several important milestones, including advancing our trials and an expected product launch, that further us on the path toward long-term value creation."

Indexes benchmarked by the FTSE Russell, a leading global index provider, are extensively used by investment managers and institutional investors for index funds as well as a tool to measure active investment strategies. Approximately \$9 trillion in assets are benchmarked against the Russell U.S. Indexes.

Membership of the well-known Russell Indexes® brings with it numerous benefits including the automatic insertion into the appropriate growth and value style indexes. This inclusion remains in place for one year. FTSE Russell traditionally determines the membership for its Russell Indexes® by objective, market-capitalization rankings and style attributes.

About FTSE Russell

FTSE Russell is a leading global index provider creating and managing a wide range of indexes, data and analytic solutions to meet client needs across asset classes, style and strategies. Covering 98% of the investable market, FTSE Russell indexes offer a true picture of global markets, combined with the specialist knowledge gained from developing local benchmarks around the world. FTSE Russell index expertise and products are used

extensively by institutional and retail investors globally. Approximately \$15 trillion is currently benchmarked to FTSE Russell indexes. For over 30 years, leading asset owners, asset managers, ETF providers and investment banks have chosen FTSE Russell indexes to benchmark their investment performance and create investment funds, ETFs, structured products and index-based derivatives. FTSE Russell indexes also provide clients with tools for asset allocation, investment strategy analysis and risk management.

About Volition

Volition is a multi-national epigenetics company developing simple, easy to use, cost effective blood tests to help diagnose a range of cancers and other diseases. Early diagnosis has the potential to not only prolong the life of patients, but also to improve their quality of life. The tests are based on the science of Nucleosomics™, which is the practice of identifying and measuring nucleosomes in the bloodstream or other bodily fluid - an indication that disease is present. Volition is primarily focused on human diagnostics but also has a subsidiary focused on animal diagnostics.

Volition's research and development activities are centered in Belgium, with additional offices in Texas, London and Singapore, as the company focuses on bringing its diagnostic products to market.

Safe Harbor Statement

Statements in this press release may be "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that concern matters that involve risks and uncertainties that could cause actual results to differ materially from those anticipated or projected in the forward-looking statements. Words such as "expects," "anticipates," "intends," "plans," "aims," "targets," "believes," "seeks," "estimates," "optimizing," "potential," "goal," "suggests," "could," "would," "should," "may," "will" and similar expressions identify forward-looking

statements, and include statements regarding the inclusion in the Russell Indexes and the effects thereof, the effectiveness of Volition's blood-based diagnostic tests as well as Volition's ability to develop and successfully commercialize such test platforms for early detection of cancer and other diseases. Volition's actual results, and the timing of events, may differ materially from those indicated in or implied by these forward-looking statements due to numerous risks and uncertainties, including, without limitation, results of studies testing the efficacy of its tests. For instance, if Volition fails to develop and commercialize diagnostic products, it may be unable to execute its plan of operations. Other risks and uncertainties include those identified under the heading "Risk Factors" in Volition's most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q, as well as those identified in documents that Volition files with the Securities and Exchange Commission from time to time. These statements are based on current expectations, estimates and projections based, in part, on assumptions made by management. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. Forward-looking statements are made as of the date of this release, and, except as required by law, Volition does not undertake an obligation to update its forward-looking statements to reflect future events or circumstances.
