Participants joining any of the above-referenced conferences who would like to schedule a

virtual 1-on-1 meeting with Volition management may do so by registering at the links above, or by contacting Scott Powell, Executive Vice President of Investor Relations, at investorrelations@volition.com.

About Volition

Volition is a multi-national epigenetics company developing simple, easy to use, cost effective blood tests to help diagnose a range of cancers and other diseases. Early diagnosis has the potential to not only prolong the life of patients, but also to improve their quality of life. The tests are based on the science of Nucleosomics™, which is the practice of identifying and measuring nucleosomes in the bloodstream or other bodily fluid - an indication that disease is present. Volition is primarily focused on human diagnostics but also has a subsidiary focused on animal diagnostics.

Volition's research and development activities are centered in Belgium, with additional offices in Texas, London and Singapore, as the company focuses on bringing its diagnostic products to market.

Nucleosomics™ is a trademark and/or service mark of VolitionRx Limited and its subsidiaries.
