# VolitionRx Appoints LifeSci Advisors as Investor Relations Consultants

***Volition to participate in the upcoming 14<sup>th</sup> Annual LifeSci Partners Corporate Access Event on January 15<sup>th</sup>, 2025 at the Beacon Grand Hotel in San Francisco.***

HENDERSON, Nev., Dec. 12, 2024 /PRNewswire/ -- VolitionRx Limited (NYSE AMERICAN: VNRX) ("Volition" or the "Company"), a multi-national epigenetics company, announced that it has retained LifeSci Advisors, LLC ("LSA") a premiere life sciences corporate and financial communications agency, to provide investor relations advisory services.

Cameron Reynolds, President and Group Chief Executive Officer, noted, "We warmly welcome LSA at this critical stage in Volition's corporate development. In 2024, Volition has made significant strides across all of the Company's strategic imperatives, including the in-clinic launch of Nu.Q<sup>®</sup> Vet Cancer Test in the U.S. and Europe through Antech.

"For 2025, we have multiple financial and value creating operating milestones in the human space for both cancer and sepsis. LSA has been tasked to accelerate awareness of Volition through their group's extensive relationships with institutional money managers and family funds focused on the life sciences space."

Volition will participate in the upcoming 14th Annual LifeSci Partners Corporate Access Event taking place on January 15th, 2025 at the Beacon Grand Hotel in San Francisco, and coinciding with the annual J.P. Morgan Health Care Conference. Volition's management team will be available for one-on-one meetings at the event. To register for the event and request a meeting with Volition, please visit [LifeSci CAE 2025](#).

LSA, with over 250 employees and a local presence that spans New York, Chicago, Boston, London, Geneva, Paris, and Tel-Aviv, provides life science companies comprehensive solutions to communications and investor outreach.

## **About Volition**

Volition is a multi-national company focused on advancing the science of epigenetics. Volition is dedicated to saving lives and improving outcomes for people and animals with life-altering diseases through earlier detection, as well as disease and treatment monitoring.

Through its subsidiaries, Volition is developing and commercializing simple, easy to use, cost-effective blood tests to help diagnose and monitor a range of diseases, including some cancers and diseases associated with NETosis, such as sepsis. Early diagnosis and monitoring have the potential not only to prolong the life of patients, but also to improve their quality of life.

Volition's research and development activities are centered in Belgium, with an innovation laboratory and office in the U.S. and additional offices in London and Singapore.

### **Safe Harbor Statement**

Statements in this press release may be "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that concern matters that involve risks and uncertainties that could cause actual results to differ materially from those anticipated or projected in the forward-looking statements. Words such as "expects," "anticipates," "intends," "plans," "aims," "targets," "believes," "seeks," "estimates," "optimizing," "potential," "goal," "suggests," "could," "would," "should," "may," "will" and similar expressions identify forward-looking statements. These forward-looking statements relate to, among other topics, Volition's expectations related to revenue opportunities and growth, the timing, completion, success and delivery of data from clinical studies, the timing of publications, , the effectiveness and availability of Volition's blood-based diagnostic, prognostic and disease monitoring tests, Volition's ability to develop and successfully commercialize such test platforms for early detection of cancer and other diseases as well as serving as a diagnostic, prognostic or disease monitoring tools for such diseases, and Volition's success in securing licensing and/or distribution agreements with third parties for its products. Volition's actual results may differ materially from those indicated in these forward-looking statements due to numerous risks and uncertainties, including, without limitation, results of studies testing the efficacy of its tests. For instance, if Volition fails to develop and commercialize diagnostic, prognostic or disease monitoring products, it may be unable to execute its plan of operations. Other risks and uncertainties include Volition's failure to obtain necessary regulatory clearances or approvals to distribute and market future products; a failure by the marketplace to accept the products in Volition's development pipeline or any other diagnostic, prognostic or disease monitoring products Volition might develop; Volition's failure to secure adequate intellectual property protection; Volition will face fierce competition and Volition's intended products may become obsolete due to the highly competitive nature of the diagnostics and disease monitoring market and its rapid technological change; downturns in domestic and foreign economies; and other risks, including those identified in Volition's most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q, as well as other documents that Volition files with the Securities and Exchange Commission. These statements are based on current expectations, estimates and projections about Volition's business based, in part, on assumptions made by management. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. Forward-looking statements are made as of the date of this press release, and, except as required by law, Volition does not undertake an obligation to update its forward-looking statements to reflect future events or circumstances.
