VolitionRx Appoints Harvard Professor, Dr. Lee-Jen Wei to Its Scientific Advisory Board

ISNES, Belgium, March 7, 2018 /PRNewswire/ -- VolitionRx Limited (NYSE AMERICAN: VNRX) ("Volition") today announced that it has further strengthened its Scientific Advisory Board with the addition of Dr. Lee-Jen Wei, a professor of Biostatistics at Harvard University.

Prof. Wei's main area of research is developing statistical methods for the design and analysis of clinical trials. He was named as a Cancer Expert by The National Cancer Institute and is a multi-award-winning statistician having received the Wilks Memorial Award from the American Statistical Association.

About Professor Wei

Prof. Wei has developed numerous novel statistical methods used widely and is the author of more than 140 peer-reviewed publications. His recent research is concentrated on revitalizing clinical trial methodology and utilizing biomarkers under the risk-benefit paradigm for personalized medicine. He has worked closely with the pharmaceutical industry and regulatory agencies to aid both the development and evaluation of new products.

About the Volition Scientific Advisory Board

Chaired by Dr. Alan Colman, the Scientific Advisory Board is tasked with strengthening the clinical and commercial knowledge base of the company and is reflective of its rapidly advancing clinical development program. The SAB includes specialists from multiple scientific verticals including clinical and surgical expertise in cancer and pathology as well as commercial experience in ELISA product development with global diagnostic companies.

About Volition

Volition is a multi-national life sciences company developing simple, easy to use blood-based cancer tests to accurately diagnose a range of cancers. The tests are based on the science of Nucleosomics[®], which is the practice of identifying and measuring nucleosomes in the bloodstream or other bodily fluid - an indication that disease is present.

As cancer screening programs become more widespread, Volition's products aim to help to diagnose a range of cancers quickly, simply, accurately and cost effectively. Early diagnosis has the potential to not only prolong the life of patients, but also to improve their quality of life. Volition's research and development activities are currently centered in Belgium, with additional offices in London, Texas and Singapore, as the company focuses on bringing its diagnostic products to market first in Europe, then in the U.S. and ultimately, worldwide.

Safe Harbor Statement

Statements in this press release may be "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that concern matters that involve risks and uncertainties that could cause actual results to differ materially from those anticipated or projected in the forward-looking statements. Words such as "expects," "anticipates," "intends," "plans," "aims," "targets," "believes," "seeks," "estimates," "optimizing," "potential," "goal," "suggests," "could," "would," "should," "may," "will" and similar expressions identify forward-looking statements. These forward-looking statements relate to the effectiveness of Volition's bodily-fluid-based diagnostic tests as well as Volition's ability to develop and successfully commercialize such test platforms for early detection of cancer. Volition's actual results may differ materially from those indicated in these forward-looking statements due to numerous risks and uncertainties. For instance, if Volition fails to develop and commercialize diagnostic products, it may be unable to execute its plan of operations. Other risks and uncertainties include Volition's failure to obtain necessary regulatory clearances or approvals to distribute and market future products in the clinical IVD market; a failure by the marketplace to accept the products in Volition's development pipeline or any other diagnostic products Volition might develop; Volition will face fierce competition and Volition's intended products may become obsolete due to the highly competitive nature of the diagnostics market and its rapid technological change; and other risks identified in Volition's most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q, as well as other documents that Volition files with the Securities and Exchange Commission. These statements are based on current

expectations, estimates and projections about Volition's business based, in part, on assumptions made by management. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. Forward-looking statements are made as of the date of this release, and, except as required by law, Volition does not undertake an obligation to update its forward-looking statements to reflect future events or circumstances.

Pursuant to the disclosure requirements of the NYSE MKT Company Guide Section 610(b), Volition is reporting that its audited consolidated financial statements for the fiscal year ended December 31, 2017, included in Volition's Annual Report on Form 10-K filed with the Securities and Exchange Commission on March 1, 2018, contains an audit opinion from its independent registered public accounting firm that includes an explanatory paragraph related to Volition's ability to continue as a going concern.
