## **Volition Secures Additional \$700,000 Non-Dilutive Funding from the Walloon Region**

ISNES, Belgium, July 2, 2018 /PRNewswire/ -- VolitionRx Limited (NYSE AMERICAN: VNRX) ("Volition") today announced that it has been awarded additional non-dilutive funding of approximately \$700,000 from the Walloon Regional Government. Including this latest amount, Volition has received approximately \$3.7 million in non-dilutive funding from a number of local agencies to date.

Dr. Gaetan Michel, Chief Executive Officer of Volition's wholly-owned subsidiary, Belgian Volition SPRL, commented, "We are grateful to the Walloon Region, and in particular to the Vice-President of the Walloon Government and Minister for Economy, Industry, Research, Innovation, Digital, Employment and Training, Mr. Pierre-Yves Jeholet for his continued support of the Company. We are committed to the region and plan to recruit even more of the talented scientists in the area. This funding will support our continued research and development activities towards what we hope will be life-saving cancer diagnostic tests."

Belgian Volition SPRL today also released a new video featuring its Laboratory in Belgium including interviews with team members. Click [here](#) to watch the video filmed in June 2018.

### **Details About the Funding**

Approximately \$200,000 of this funding is repayable with annual installments over 12 years commencing in 2020. In addition to this, a percentage of Volition's revenue may be payable over the same period.

### **About Volition**

Volition is a multi-national life sciences company focused on developing simple, easy to use, cost effective blood tests designed to help diagnose a range of cancers. The tests are based on the technology platform of Nucleosomics®, which is the practice of identifying and measuring nucleosomes in the bloodstream or other bodily fluid - an indication that disease is present.

As cancer screening programs become more widespread, Volition's products aim to help to diagnose a range of cancers quickly, simply, accurately and cost effectively. Early diagnosis has the potential to not only prolong the life of patients, but also to improve their quality of life. Volition's research and development activities are currently centered in Belgium, with additional offices in London, Texas and Singapore, as the company focuses on bringing its diagnostic products to market first in Europe, then in the U.S. and ultimately, worldwide.

## **Safe Harbor Statement**

Statements in this press release may be "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that concern matters that involve risks and uncertainties that could cause actual results to differ materially from those anticipated or projected in the forward-looking statements. Words such as "expects," "anticipates," "intends," "plans," "aims," "targets," "believes," "seeks," "estimates," "optimizing," "potential," "goal," "suggests," "could," "would," "should," "may," "will" and similar expressions identify forward-looking statements. These forward-looking statements relate to the effectiveness of Volition's bodily-

fluid-based diagnostic tests as well as Volition's ability to develop and successfully commercialize such test platforms for early detection of cancer. Volition's actual results may differ materially from those indicated in these forward-looking statements due to numerous risks and uncertainties. For instance, if Volition fails to develop and commercialize diagnostic products, it may be unable to execute its plan of operations. Other risks and uncertainties include Volition's failure to obtain necessary regulatory clearances or approvals to distribute and market future products in the clinical IVD market; a failure by the marketplace to accept the products in Volition's development pipeline or any other diagnostic products Volition might develop; Volition will face fierce competition and Volition's intended products may become obsolete due to the highly competitive nature of the diagnostics market and its rapid technological change; and other risks identified in Volition's most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q, as well as other documents that Volition files with the Securities and Exchange Commission. These statements are based on current expectations, estimates and projections about Volition's business based, in part, on assumptions made by management. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. Forward-looking statements are made as of the date of this release, and, except as required by law, Volition does not undertake an obligation to update its forward-looking statements to reflect future events or circumstances.
