Watch Volition's Capital Market Event, October 20, 2020

The presentation focused on new data and the launch and commercial roll out of the company's first product, the Nu.Q™ Vet Cancer Screening Test, which is on target for a launch this year. The presentation also provided an update on recent developments and Volition's activities, including new and ongoing clinical trials in blood cancer.

Commenting on the event Cameron Reynolds, President and Chief Executive Officer of Volition said, "We were delighted to host a busy virtual capital markets event yesterday and would like to thank all of those that joined the event live. This is an exciting time for the company as we prepare for the launch of the Nu.Q™ Vet Cancer Screening Test later this year. I am equally delighted to share a video of the presentation and Analyst Question and Answer session so that those unable to attend can view in their own time."

 Dr. Heather Wilson-Robles, Professor at Texas A&M University and Chief Medical Officer of Volition Veterinary Diagnostics Development LLC I presented the product

- launch data for the Nu.Q™ Vet Cancer Screening Test.
- Dr. Gaetan Michel, Chief Executive Officer of Belgian Volition SPRL and Volition
 Veterinary Diagnostics Development LLC discussed the Nu.Q™ Vet Cancer Screening
 Test launch and roll-out plan.
- Dr. Jason Terrell, Chief Medical Officer of Volition presented new clinical data for our Nu.Q[™] platform in human blood cancer studies and discussed new and ongoing clinical trials.

The video of the event and the PowerPoint are both posted to the Volition website at volition.com

About Volition

Volition is a multi-national epigenetics company developing simple, easy to use, cost effective blood tests to help diagnose a range of cancers and other diseases. Early diagnosis has the potential to not only prolong the life of patients, but also to improve their quality of life. The tests are based on the science of NucleosomicsTM, which is the practice of identifying and measuring nucleosomes in the bloodstream or other bodily fluid - an indication that disease is present. Volition is primarily focused on human diagnostics but also has a subsidiary focused on animal diagnostics.

Volition's research and development activities are centered in Belgium, with additional offices in Texas, London and Singapore, as the company focuses on bringing its diagnostic products to market.

Nucleosomics[™] and Nu.Q[™] and their respective logos are trademarks of Volition and its subsidiaries.

Safe Harbor Statement

Statements in this press release may be "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that concern matters that involve risks and uncertainties that could cause actual results to differ materially from those anticipated or projected in the forward-looking statements. Words such as "expects," "anticipates," "intends," "plans," "aims," "targets," "believes," "seeks," "estimates," "optimizing," "potential," "goal," "suggests," "could," "would," "should," "may," "will" and similar expressions identify forward-looking statements. These forward-looking statements relate to the timing of the commercial launch of Volition's test platforms for early detection of cancer and other diseases. Volition's actual results may differ materially from those indicated in these forward-looking statements due to numerous risks and uncertainties, including, without limitation, results of studies testing the efficacy of its tests. For instance, if Volition fails to develop and commercialize diagnostic or prognostic products, it may be unable to execute its plan of operations. Other risks and uncertainties include Volition's failure to obtain necessary regulatory clearances or approvals to distribute and market future products; a failure by the marketplace to accept the products in Volition's development pipeline or any other diagnostic or prognostic products Volition might develop; Volition's failure to secure adequate intellectual property protection; Volition will face fierce competition and Volition's intended products may become obsolete due to the highly competitive nature of the diagnostics market and its rapid technological change; downturns in domestic and foreign economies; and other risks identified in Volition's most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q, as well as other documents that Volition files with the Securities and Exchange Commission. These statements are based on current expectations, estimates and projections about Volition's business based, in part, on assumptions made by management. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. Forward-looking statements are made as of the date of this release, and, except as required by law, Volition does not undertake an obligation to update its forwardlooking statements to reflect future events or circumstances.
