Check whether the Issuer (1) filed all reports required to be filed by section
13 or 15 (d) of the Exchange Act during the past 12 months (or for a shorter
period that Standard was required to file such reports), and (2) has been
subject to such filing requirements for the past 90 days.

(1) Yes [X] No [] (2) Yes [X] No []

Check if there is no disclosure of delinquent filers in response to Item 405 of
Regulation S-B is not contained in this form, and no disclosure will be
contained, to the best of Standard's knowledge, in definitive proxy or
information statements incorporated by reference in Part III of this Form 10-KSB
or any amendment to this Form 10-KSB. []

State issuer's revenues for its most recent fiscal year: \$ -0-

State the aggregate market value of the voting stock held by nonaffiliates of

Standard. The aggregate market value shall be computed by reference to the price at which the stock was sold, or the average bid and asked prices of such stock, as of a specific date within the past 60 days.

As at August 31, 2003, the aggregate market value of the voting stock held by nonaffiliates is undeterminable and is considered to be 0.

(ISSUER INVOLVED IN BANKRUPTCY PROCEEDINGS DURING THE LAST FIVE YEARS)

Not applicable

(APPLICABLE ONLY TO CORPORATE COMPANYS)

As of August 31, 2003, Standard has 1,295,000 shares of common stock issued and outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Exhibits incorporated by reference are referred under Part IV.

PART 1

ITEM 1. DESCRIPTION OF BUSINESS

HISTORY AND ORGANIZATION

Standard was incorporated on September 24, 1998 and has no subsidiaries and no affiliated companies. It has not been in bankruptcy, receivership or similar proceedings since its inception. Nor has it been involved in any material reclassification, merger, consolidation or purchase or sale of any significant assets not in the ordinary course of business. Standard's executive offices are located at 34-3387 King George Highway, Surrey, B.C., V4P 1B7 (Tel: 604-538-4898).

Standard is engaged in the exploration of a mineral claim known as the "Standard". (see Part 1, "Exploration and Development of the Standard Claim"). Standard is referred to as being in the "pre-exploration" stage by its auditors. This term is generally used in Financial Accounting Standards to describe a company seeking to develop its ideas and products. Standard is not in the development stage with regards to any mineral claim. No ore reserve has been discovered and no substantial exploration has been done on its mineral claim. Standard is purely an exploration company. There is no assurance that any ore reserve will ever be found and that Standard will have sufficient funds to undertake the exploration work required to identify an ore reserve.

Management anticipates that Standard's shares will be qualified on the system of the National Association of Securities Dealers, Inc. ("NASD") known as the OTC Bulletin Board (the "OTCBB"). At the present time, Standard has made no application to the OTCBB and there is distinct possibility its shares will never be quoted on the OTCBB.

Standard owns the exclusive rights to all minerals on the Standard claim except for coal which is under a separate license. There is virtually limited possibilities that there is any coal on the Standard claim. The claim is in good standing until February 24, 2004. The actual land is owned by the Crown (the Province of British Columbia). If Standard does not perform exploration work or pay cash-in-lieu in the amount of \$2,800 on or before February 24, 2004 the rights to the mineral claim will expire and the ground can be staked by someone else.

Standard has no revenue to date from the exploration of the Standard claim, and

its ability to effect its plans for the future will depend on the availability of financing. Such financing will be required to explore the Standard claim to a stage where a decision can be made by management as to whether an ore reserve exists and can be successfully brought into production. Standard anticipates obtaining such funds from its directors and officers, financial institutions or by way of the sale of its capital stock in the future (see Part 1, Item 2 - "Plan of Operations"), but there can be no assurance that Standard will be successful in obtaining additional capital for exploration activities from the sale of its capital stock or in otherwise raising substantial capital.

Standard is responsible for filing various forms with the United States Securities and Exchange Commission (the "SEC") such as Form 10-KSB and Form 10-QSB but was deficient in these filings due to a lack of money. The filings have now been brought up to date. Standard has not distributed any material to its shareholders but is planning to hold an Annual General Meeting of Shareholders in the early part of 2004.

The shareholders may read and copy any material filed by Standard with the SEC at the SEC's Public Reference Room at 450 Fifth Street, N.W., Washington, DC, 20549. The shareholders may obtain information on the operations of the Public

-4-

Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site that contains reports, proxy and information statements, and other information which Standard has filed electronically with the SEC by assessing the website using the following address: <http://www.sec.gov>. Standard has no

website at this time.

PLANNED BUSINESS

The following discussion should be read in conjunction with the information contained in the financial statements of Standard and the notes, which form an integral part of the financial statements, which are attached hereto.

The financial statements mentioned above have been prepared in conformity with accounting principles generally accepted in the United States of America and are stated in United States dollars.

Standard presently has minimal day-to-day operations; consisting mainly of maintaining the Standard claim in good standing and preparing the reports filed with the SEC as required.

RISK FACTORS

Our shareholders and any future investors must be aware of the following risk factors prior to investing in Standard's common stock. It must be emphasized that Standard, if any of these risk become fact, may have to cease operations and our shareholders and any future investors could lose part or all of their investment.

RISKS ASSOCIATED WITH THIS OFFERING

1. Penny stock rules may make buying or selling of our shares difficult.

Eventual trading in our shares will, in all likelihood, be subject to the "Penny Stock" rules. The SEC has adopted regulations that generally define a penny stock to be any equity security that has a market price of less than \$5.00 per share, subject to certain exceptions. These rules require that any broker-dealer who recommends our shares to persons other than prior customers and accredited investors, must prior to the sale, make a special written suitability determination for the purchaser and receive the purchaser's written agreement to execute the transaction. Unless an exception is available, the regulations require the delivery, prior to any transaction involving a penny stock, of a disclosure explaining the penny stock market and the risks associated with trading in the penny stock market. In addition, broker-dealers must disclose commissions payable to both the broker-dealer and the registered representative and current quotations for the securities they offer. The additional burdens imposed upon broker-dealers by such requirements may

discourage broker-dealers from effecting transactions in our shares, which could severely limit their market price and liquidity of our shares. Broker-dealers who sell penny stocks to certain types of investors are required to comply with the Commission's regulations concerning the transfer of penny stock. These regulations require broker-dealers to:

- - Make a suitability determination prior to selling a penny stock to the purchaser;
- - Receive the purchaser's written consent to the transaction; and
- - Provide certain written disclosures to the purchaser.

From our standpoint, it might be difficult for us to induce new investors to purchase shares since they might not want to be involved in a penny stock company. Future investors must be aware that our shares will fall into the classification of a penny stock and therefore be subject to the rules mentioned above and the various limitations associated with these rules.

-5-

2. We may, in the future, conduct offerings of our common stock in which case all shareholdings will be diluted.

In the future, we may conduct offerings of shares to finance our exploration activities on the Standard claim or to finance subsequent exploration projects that we decide to undertake. If we decide to raise money through offerings in the future all shareholdings will be diluted.

3. There is no public trading market for our common shares and our shareholders may not be able to sell his or her shares at any time and on terms and conditions he or she considers reasonable.

There is currently no public trading market for our common stock and therefore, there is no central place, like a stock exchange or electronic trading system, to resell one's shares. If one of our shareholders does want to resell his or her shares, they will have to locate a buyer and negotiate their own sale. Even if our shareholder is able to find a willing buyer, there can be no assurance he or she will be able to sell their shares at or above the price at which these shares were purchased.

4. If we are successful in obtaining a market for our shares certain internal and external forces will affect the value of our trading shares.

The stock market has experienced extreme volatility in recent years and may continue to do so in the future. We cannot be sure an active public market for our shares will develop or if an active market should develop that it would continue. The price for our shares will be determined in the marketplace and may be influenced by many factors, including both internal and external forces as follows:

- - variations in our financial results compared to companies similar to ours; especially in the exploration of the Standard claim compared to other exploration properties in North America;
- - changes in earnings estimates, if any, by industry research analysts for our Company or for similar companies in the same industry;
- - future investors or other market participants perceptions of our Company as a current or future investment; and
- - general or regional economic conditions normally have a wide impact on the price of shares trading on the stock market and our Company's shares will be affected by changes in such conditions.

The problem we encounter with a volatile stock market, which we have no control over, is that we might not require funds when the market price of our shares are high but when the price is lower we might require funds to maintain the Company and explore the Standard claim. This would result in having to issue additional shares during lower prices; resulting in a greater dilution effect on

our shareholders.

5. We may not be able to maintain a quotation of our common stock on the OTCBB due to not filing the required information as it is due, which would make it more difficult for an investor to sell our shares.

Even if our Company is accepted for a quotation on the OTCBB, we cannot guarantee that it will always be available for quotation. The OTCBB is not an issuer listing service, market or exchange. Although the OTCBB does not have any listing requirements per se, to be eligible for quotation on the OTCBB, issuers must remain current in their filings with the SEC. Market makers will not be permitted to begin quotation of a security whose issuer does not meet this

-6-

filing requirement. Securities already quoted on the OTCBB that become delinquent in their required filings will be removed following a 30 or 60 day grace period if they do not make their required filing during that time. If our shares were not quoted on the OTCBB, trading in our shares would be conducted, if at all, in the over-the-counter market. This would make it more difficult for stockholders to dispose of their common stock and more difficult to obtain accurate quotations for our shares. This could have an adverse effect on the price of the common stock.

6. We are not planning to declare a dividend in either cash or shares in the near future.

We are not planning to declare a dividend in either cash or shares in the near future since our policy will be to retain any earnings received for the future exploration of the Standard or any other mineral claims obtained by us. Dividends are only declared by your Director when he feels that surplus funds can be distributed to the shareholders without encroaching upon working capital of our Company.

7. We want to advise our shareholders and future investors that the purchase of shares in our Company involves a high degree of risk.

An investment in the shares of our Company is highly speculative and involves a high degree of risk. For example, the Company is a start-up situation and the failure rate for most start-up companies is high. Any person considering an investment in our shares should be fully aware that they could lose their entire investment.

RISK FACTORS ASSOCIATED WITH STANDARD

1. Our auditors have indicated, in their opinion report, a concern regarding the going concern status of our Company.

The auditors have expressed a concern regarding whether our Company will continue as a going concern if it does not receive adequate financing to meet its obligations. The auditors are indicating there might be substantial doubt regarding our Company's continuation as an operating concern over the next twelve months. If our director is unwilling to advance us some funds to maintain our Company in good standing, there is the possibility that we might cease to be an operating company. As a shareholder of our Company you should read the auditors' report and Note 5 to the audited financial statements included in this Form 10-KSB.

2. We lack an operating history and have accumulated losses which are expected to continue into the future.

Since inception, we have not realized any revenue to date and have no operating history upon which an evaluation of our future success or failure can be made. The accumulated losses since February 24, 1998 are \$ 68,104. Our ability to achieve and maintain profitability and positive cash flow is dependent upon:

- - Our ability to successfully explore the Standard claim;
- - Our ability to generate future revenues from a viable ore reserve on the Standard claim; and

- - Our ability to reduce our exploration costs in order to increase our profit margins.

As in most mineral claims, the changes of success of identifying and developing an ore reserve are extremely remote. The majority of mining companies never find an ore reserve and therefore are never profitable.

3. Presently we have only two employees and will require additional employees during the exploration of the Standard claim.

We currently only have two employees, the President, E. Del Thachuk and Secretary Treasurer, Maryanne Thachuk. There is a substantial risk we may not

-7-

have the funds necessary to hire additional employees that would be needed in our future exploration program. We may not be able to maintain the Standard claim in good standing with the Ministry of Energy and Mines for the Province of British Columbia if we do not have individuals prepared to work during the exploration stage.

4. Our mineral claim is considered "grass roots" because it has not had adequate exploration work performed on it to identify an ore reserve.

Our mineral claim is considered a "grass roots" claim having no known ore reserves associated with it. In addition, there has, over the years, not been enough exploration work on the claim to determine the extent, if any, of any mineralization. Therefore, there is a good chance our claim might prove to be barren; having no commercial viable mineralization associated with it.

5. We can spend funds on exploration with no assurance we will prove the Standard claim has an ore body associated with it.

No matter how many dollars are spent in the future on the Standard claim, there is no guarantee that such expenditures will result in it being a property of merit; having a proven commercially viable ore reserve on it. We might spend hundreds of thousands of dollars and prove nothing. As more money is required for exploration, the present and future investors will have their share positions diluted without realizing any future benefits from the Standard claim.

6. We may not be able to raise money for exploration when needed due to the prevailing price of gold which is beyond our control.

Even with gold prices having increased over the past year, there is reluctance in the investment community to consider speculative ventures such as exploration companies. With this reluctance, we might find it difficult to raise any money and therefore inhibit any future exploration on the Standard claim. When gold prices are lower, we will have a difficult time to attract money even if we have started to identify gold showings on the Standard claim. The market price of gold is beyond our control and will greatly affect our raising of money.

7. Our Company is a one-property company which does not allow for exploration of another mineral claim in the event no ore reserve is discovered on the Standard claim.

Our only mineral claim is the Standard claim which has no known ore reserves on it. Being a one claim company means that if the Standard claim does not prove to have any viable mineral reserves associated with it, there is no other claim which we can immediately explore. Most investors would want to have an investment in a company that has some diversification in its mineral properties to allow for continual operations.

8. Our mineral property, when explored, may not be of economic quality to warrant a decision to go into production.

We might discover an ore reserve which is either too small or the ounces per ton makes it uneconomical to develop. Such a mineral deposit would not enhance the value of the Standard claim and have resulted in money having been spent which would have proven nothing. No production decision can be made if this is the

case. Minerals are only economic to us if they can be sold above the cost of mining them; otherwise, the Standard claim has little or no value.

9. We will have to compete with both large and small mining companies for such things as money, properties of merit, workers and supplies.

In both the United States and Canada, there are many large and small mining companies each trying to explore and, hopefully, eventually developing their mineral properties into a producing mine. We are not in direct conflict with the larger mining companies in North America such as Newmont Mining Corp., Inco

-8-

Limited, Barrick Gold Corp. and Teck Cominco Limited, to name a few. These larger companies have the available money to explore their properties and the professional personnel to assist in the exploration process. Unless a major mineral reserve is discovered on the Standard claim, the larger mining companies would have no interest in either developing the claim themselves or joint venturing with us. The competition to us would be from the smaller exploration companies who are competing for money to explore their mineral claims and in hiring professional staff to assist them. There is only a limited amount of money available for exploration as well as professional personnel during the exploration season. We might not be able to attract either the money or professional personnel due to the other smaller exploration companies having more money and better known mineral properties.

10. Weather interruptions in the Province of British Columbia may affect and delay the proposed exploration operations.

The weather in the Province of British Columbia is always uncertain since the annual rainfall, especially in the Bralorne area, can be many inches in the fall and spring months. The winters are marked with below zero temperatures and accumulated snow covers of several feet. The constant rain, during the spring and fall months, will lessen the changes of our exploration crew performing any meaningful work on the Standard claim due to the possibilities of injuries from slippery rock surfaces and the inconvenience of setting up equipment that become immediately wet. During the drier summer months, the Ministry of Forestry for the Province of British Columbia might impose bans on exploration to avoid the possibilities of forest fires. With these factors in mind, our exploration season could be reduced substantially and we might not be able to obtain the results we want during our exploration program.

11. The terrain surrounding the Standard claim is rugged and is not inductive to exploration activities.

The terrain surrounding the Standard claim is mountainous and extremely rugged with steep ridges and deep valleys. The exploration crew will find it difficult to explore the entire Standard claim without the use occasionally of a helicopter. Access to the claim during the winter months is virtually impossible due to the heavy snow conditions. Even with snowmobiles, the exploration crew would find it difficult to reach our claim and return to Gold Bridge within one day. It is not an option during the winter to use tent facilities on our claim due to the possibility of snow slides. The terrain has a definite effect the exploration activities on the Standard claim.

12. We will have to address the environmental concerns in the Bralorne area and adhere to the various Acts legislated to protect the environment.

During the exploration stage, there are few problems with environmental issues in the Province of British Columbia if the exploration work involves mapping, establishment of a grid, soil and rock sampling and some minor drilling. If the exploration program involves work near an existing stream or removal of a substantial amount of overburden and foliage, then permission for the work must be obtained from one of the various Ministries involved in that area of environmental concern. If a production decision is ever made, we will have to adhere to various Acts established by the Provincial Government. Under these Acts the main concerns are wildlife, including fish in streams, and vegetation. The Government does not want exploration activities to cause excessive hardship on the environment and to disfigure our claim for decades to come. It is important to protect wildfire since the area in which our claim is situated has

been their natural habitat for centuries. The cost of adhering to these Acts might be too expensive for us and exploration activities might have to be cancelled or delayed until adequate money is available to us to adhere to the requirements of the Acts. At the present time, we have no indication as to what the dollar amount of adherence would be.

-9-

13. We are a small Company without much money to devote for a full exploration program on our mineral claim.

The small size of our Company and the present lack of money means a limited exploration program on our claim. Unless adequate money is raised, we will be unable to devote the time necessary to fully explore our claim. With only a limited budget for exploration activities, we will not have many employees to perform the exploration activities on our claim. By limiting our operations, it will take longer to explore the Standard claim. Our shareholders should be aware that it might take a number of years to realize any exploration results from our claim due to the present lack of exploration money.

14. We cannot guarantee the title of our claim since there may be unregistered claims that we are unaware of at this time.

We cannot guarantee absolute title to the Standard claim due to such factors as prior unregistered transactions, native land claims or undetected defects in title. We have taken all the necessary precautions to eliminate any of these elements as far as are reasonably possible. Nevertheless, the future, and especially if and when a production decision is made on the Standard claim, there may be claims which presently we are completely unaware of. We have no way of insuring against such claims and cannot estimate at the present time if there are any elements out there which will effect the title to the minerals on our claim. If there are, this could result in lengthy and costly legal actions, which at the present time we do not have the funds to carry on.

15. At the present time, we will have difficulty in attracting mining personnel who would like to work for a well-funded company having an assortment of mineral properties.

Being a small exploration company with only the Standard claim, we might not be able to attract mining personnel to carry on our exploration activities when needed. Many geologist and workers are drawn to companies which are better funded than us and have several properties which can be worked on at any given time. Once an exploration program is completed on one property the personnel are transferred to another property to commence work on it. This basically guarantees a continual stream of work for exploration personnel. We, at this time, cannot offer workers this form of continual work. To offset this, we might have to hire lesser knowledgeable workers who are prepared to work for several weeks and then become unemployed. Without quality mining personnel, there is no assurance we will be able to obtain the exploration information we require to make future decisions. The quality of the our workers should be of concern to our shareholders since they would want to know that there is a possibility of obtaining the best results possible from qualified personnel.

16. We do not carry any insurance policy to protect workers during the exploration stage other than as required by legislation.

Injury to personnel is enhanced due to the effects of weather and the terrain. We have no insurance to cover such hazards to workers on our claim other than Workers' Compensation which is required to be contributed to by us for any workers working on our claim. Basically this insurance covers only wages while off work and does not provide for any long-term benefits. We are not prepared to pay the premiums required to obtain accident insurance for the short duration of our exploration program. By not having accident and liability insurance we realize we are subject to lawsuits which, if successful, would impair the working capital of our Company and might render us insolvent.

-10-

17. Our Director does not have experience in hard rock mining and none of the officers are professional geologists.

Our President, Del Thachuk, has mining experience over the past 30 years; mainly in the placer mining through the private ownership of a property in Atlin, British Columbia. In addition, he was the President of Red Fox Minerals Ltd., a company previously listed on the Vancouver Stock Exchange, Canada, ten years ago. His experience in hard rock mining is limited. He does not have any professional training as a mining person and has gained any knowledge he has from a hands on approach to exploration. Maryanne Thachuk has no mining experience and has never been involved in the exploration of a mineral property. To explore our claim, we will have to rely upon mining consultants; an expensive way to explore with no guarantees of favorable results.

18. Our President has interests in another company which cause him to devote time and effort to their activities resulting in a conflict of interest.

Del Thachuk is also a director and officer of Info-Pro Marketing Inc. ("Info-Pro"), a Nevada incorporated company, which will eventually seek a listing on the OTCBB. Even though Info-Pro is involved in marketing certain books on the Internet under the title of "The Basics of Business Success", Del has a conflict of interest relating to the number of hours he can spend on our Company and Info-Pro. In addition, he will have to raise money for both companies and therefore we have to rely upon his discretion as to what money he will be raising for Info-Pro and what money he will raise for us. We can only hope Del will devote sufficient time to the affairs of our Company and allocate any future money raising so that we will be maintained in good standing and can commence our exploration program on our claim. Even with full disclosure by Del, we cannot insure that we will receive fair and equitable treatment in every transaction.

19. We have only one directors and the officers of our Company are related by marriage which is not inductive to independency at the management level of our Company.

We have only one director who is also our President. Del Thachuk is married to the Secretary Treasurer of our Company. Therefore, there is basically no independent director or officer to oversee various transactions entered into by us. The likelihood of the Secretary Treasurer disputing any transaction entered into by the sole director is remote. Our shareholders should be aware that there is no independent officer or director to continually monitor the activities of our company and therefore our shareholders will have to put their faith in the honesty of the existing management.

20. We do not carry a policy for key man insurance, which in the event we wish to replace our management team funds will not be available to do so.

We have not subscribed to a key man insurance policy in the event that our current director and President either departs from our Company or meets an untimely end. There will be no proceeds from insurance to allow us to attract an individual to replace our President and it is unlikely we will have extra money on hand to be allocated for this purpose.

-11-

ITEM 2. DESCRIPTION OF PROPERTY

History of the Standard claim

The Standard claim was staked February 24, 1999 after the rights of the previous owners had expired. The claim covers 15.8 square miles located within the Bridge River Gold Camp near the historic Bralorne-Pioneer Mine. The Bralorne-Pioneer Property represents the largest single gold producer in B.C., having produced over 4 million ounces of gold from ore averaging 0.53 oz/ton during the period 1932-1971.

Standard engaged the services of Calvin Church, Professional Geologist, to prepare a geological report on the Standard claim. His report was dated May 27, 1999 and parts of it are noted in this Form 10-KSB. Church's report covers the geology and mineralization in the Bridge River mining camp and potential for discoveries on the Standard claim.

Location, Access and Physiography of the Standard claim

The Standard claim is located approximately 113 miles north of Vancouver and 2.5 miles southeast of the town of Gold Bridge in southwestern British Columbia. The geographical centre of the claim is given by the U.T.M. coordinates 516600E, 5626700N (Lat. 50 47'35"N, Long. 122 45'53"W) on N.T.S. mapsheet 92J/15. The town of Gold Bridge can be accessed by all weather gravel road (highway #40B) from Lillooet or via the Hurley River forestry road from Pemberton. Access to the north end of the claim is by four-wheel drive vehicle up Fergusson Creek to the headwaters above 5,800 feet elevation. Helicopters are available from bases in the towns of Pemberton or Lillooet.

The property is situated near the northwest end of the Bendor Range within the Coast Mountains where steep west facing slopes of Mt. Fergusson range from 5,000 to 8,500 feet. Sub-alpine scrub alder and hemlock trees grow at lower elevations in the southwest corner of the claim and rock exposure is good along peaks and ridges in the east half of the claim. The winters are cold with generally high snowfall accumulations and summers are hot and dry.

Claim Status

The Standard claim was staked by professional staker and is registered in the Lillooet Mining Division of British Columbia. The claim was then sold to Standard Capital Corporation, of Surrey, B.C., who own the claim outright. Mineral tenure is secure for one year from the date of staking as described below.

<i>Claim Name</i>	<i>Tenure No.</i>	<i>Units</i>	<i>Expiry Date</i>
Standard	367933	18	February 24, 2004

Regional patterns of metal zonation across the eastern flank of the Coast Plutonic Complex divide the camp into gold rich and silver rich deposits related to the proximity with the central plutons (bodies of medium to coarse-grained igneous rock that formed beneath the surface due to the solidification of magma). 'Congress type' mineralization, represented by low gold-silver ratios and antimony rich ores, developed distal to coast granitic intrusives in shear zones and Tertiary porphyry dykes. Mineralization at the Bralorne and Pioneer mines consists of gold and arsenopyrite bearing quartz veins filling in echelon tension fractures in the Bralorne diorite (a group of coarse-grained igneous rocks intermediate in composition between acidic and basic) and Pioneer greenstones. The Standard property is located in a transition zone between

gold-arsenic rich and silver-antimony rich zones. Although economic mineralization has not yet been identified on the property, rock samples from the Waterloo showing show multielement anomalies and significant gold values to warrant further investigation.

An exploration program including reconnaissance mapping, prospecting and geochemical sampling is recommended to determine the extent of the mineralizing system on the Standard claim. Further programs of trenching and drilling are recommended contingent on favorable results of each preceding exploration phase.

Exploration activities undertaken between January 18 to 21, 2002

The Legal Corner Post is located approximately 2 miles southeast of the Village of Bralorne and on the north side of Fergusson Creek. Access to the Standard claim is by snowmobile part way up the Fergusson Creek access trail to the 5,800 feet elevation and approximately 1 mile up Fergusson Creek.

The claim boundary is characterized by extreme topographical conditions. Sub-alpine scrub alder and hemlock trees grow at the creek elevations and rock

outcropping exposure is good along peaks and ridges in the east half of the canyon. The winters are cold with generally high snowfall accumulations and summers are hot and dry.

Assessment work for 2002 filed with B.C. Minfile documents the immediate claim area being prospected. Trenching and underground exploration work was completed on adjacent ground. Two zones of mineralization were identified. Assays from this sheared vein structures ranged from 8.7 g/t to 28.2 g/t gold over variable widths of 10 cm to 80 cm.

Exploration activities undertaken between February 2 to 3 and 13 to 14, 2003

The objective of this physical work program was to lay out a sampling grid system in preparation for a geochemical soils sampling program. A budget of approximately \$3,600 was expended to lay out 2,350 metres of sampling grid. The next step to be taken is to initiate a geochemistry soils program over the entire grid and prospect the ridge for geological structures.

The claims are now in good standing until February 24, 2004.

Glossary of Geological and Technical Terms

The following represents various geological and technical terms used in this Form which the reader may not be familiar with.

<TABLE>
<CAPTION>

WORD	DEFINITION
<S>	
Arsenopyrite	A monoclinic mineral most common arsenic mineral and principal ore of arsenic, occurs in many sulfide ore deposits
Anomalies. . . .	A departure from the expected or normal.
Claim	A portion of mining ground held under the Provincial laws by Standard, by virtue of one location and record where it has the mineral rights to all minerals thereon except coal.
Deposit	Mineral deposit or ore deposit is used to designate a natural occurrence of a useful mineral, or an ore, in sufficient extent and degree of concentration to invite exploration.

</TABLE>

<TABLE>
<CAPTION>

WORD	DEFINITION
<S>	
Diorite	A group of plutonic rocks intermediate in composition between acidic and basic, characteristically composed of dark- colored amphibole (especially hornblende), and plagioclase (oligoclase, andesine), pyroxene and sometimes a small amount of quartz.
Echelon	An arrangement of faults drawn up in parallel lines, but each somewhat to the left or the right of the one in the rear, like a series of steps.
Fault.	A break in the continuity of a body of rock.
Geochemical grid	Two sets of uniformly spaced parallel lines, intersecting at

<C>

right angles, by means of which the surface of an area is divided into squares when a checkerboard placement of sample soil and rock is desired.

Granitic rock	A term loosely applied to any light-colored, coarse-grained plutonic rock containing quartz as an essential component, along with feldspar and mafic minerals.
Greenstone	A field term applied to any compact dark-green altered or metamorphosed basic igneous rock that owes its color to the presence of chlorite, actinolite or epidote.
Hard-rock mining	Mining that takes place in igneous and metamorphic rock by means of drilling and blasting to extract the ore.
Igneous rock	A rock or mineral that solidified from molten or partly molten material. Igneous rocks constitute one of three main classes into which rocks are divided, the other being metamorphic and sedimentary.
Intrusive. . .	In geology, a mass of igneous rock that, while molten, was forced into or between other rocks.
Magma	Naturally occurring molten rock, generated within the Earth and capable of intrusion and extrusion, from which igneous rocks are derived through solidification and related processes.
Mineralization .	Potentially economic concentration of commercial metals occurring in nature.
Ore.	The naturally occurring mineral from which a mineral of economic value can be extracted.
Placer Mining	Mining in ground which is composed of gravel whose mineral contents are extracted by the use of water, by sluicing. Hydraulic, etc.
Quartz	It is the most common of all solid minerals and may be colorless and transparent, or colored.
Soil sample	A sample of surface material analyzed by lab techniques to test for content of trace elements occurring in nature (eg. Copper, lead, zinc, etc.)

</TABLE>

The Company's Main Product

The Company's primary product will be the sale of minerals, both precious and commercial. No minerals have been found to exist on the Standard claim and therefore the possibilities of obtaining a cash flow from the sale of minerals in the future might be remote.

The Company's Exploration Facilities

The Company will be exploring and developing, if warranted, the Standard claim and does not plan to build any mill or smelter. There exists a fully equipped smelter within 5 miles of the Standard claim but it is privately owned and may or may not accept ore from the Company to process. If the Company is unable to obtain a commitment when the claim is proven to have reserves thereon, it might have to transport the ore to other smelters which are located at great distances from the Standard claim.

During the exploration period, the Company can use tent facilities, during the summer months, to house its geological workers or it can obtain hotel accommodation in either the towns of Gold Bridge or Bralorne.

Investment Policies

The Company does not have an investment policy at this time. Any excess funds it has on hand will be deposited in interest bearing notes such as term deposits or short term money instruments. There are no restrictions on what the director is able to invest or additional funds held by the Company. Presently the Company does not have any excess funds to invest.

ITEM 3. LEGAL PROCEEDINGS

There are no legal proceedings to which Standard is a party or to which its property is subject, nor to the best of management's knowledge are any material legal proceedings contemplated.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITIES HOLDERS

No matters were submitted to a vote of shareholders of Standard during the fiscal year ended August 31, 2003. Nevertheless, the Company is preparing to have its First Annual General Meeting in the early part of 2004. All proxies and other information will be sent to shareholders prior to the Meeting.

ITEM 5. MARKET FOR COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

During the past year, there has been no established trading market for Standard's common stock. Since its inception, Standard has not paid any

-15-

dividends on its common stock, and Standard does not anticipate that it will pay dividends in the foreseeable future. As at August 31, 2003 Standard had 35 shareholders; one of these shareholders is an officer and director of Standard.

There are no securities authorized for issuance under outstanding stock options, warrants or rights. There are no employee benefit plans entered into between the Company and its director, officers, consultants or other non-employees. The Company is considering adopting an incentive stock option plan for officers, directors, employees and consultants in order to attract personnel who will assist in the development of the Company. Once the incentive stock option plan has been structured it will be presented at the Annual Meeting for shareholders' approval.

ITEM 6. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

OVERVIEW

The Company was incorporated on September 24, 1998 under the laws of the State of Delaware. The Company's Articles of Incorporation currently provide that the Company is authorized to issue 25,000,000 shares of common stock, par value \$0.001 per share. As at August 31, 2003, there were 1,295,000 shares outstanding.

LIQUIDITY AND CAPITAL RESOURCES

As at August 31, 2003, the Company had cash of \$131 and liabilities of \$44,185. The liabilities of \$23,254 owed to general creditors are as follows: the transfer agent - \$4,559, auditors - \$6,300, internal accountant - \$10,700 and other payables - \$1,695. The amount owed to related parties of \$20,931 is non-interest bearing and has not fixed terms of repayment.

During the year, the Company has incurred the following expenses:

<TABLE>
<CAPTION>

EXPENDITURE		AMOUNT
-----		-----
<S>	<C>	<C>
Accounting and audit	i	\$ 5,900
Bank charges		97
Edgar filings.	ii	900
Exploration and filing fees. . . .	iii	2,529
Filing fees and franchise taxes. .	iv	628
Management fees.	v	2,400
Office		136
Rent	vi	1,200
Telephone.	vii	600
Transfer agent's fees and interest	viii	1,829

Total expenses		\$ 16,219
		=====

</TABLE>

i. The Company accrues \$500 in fees to its auditors, Sellers and Andersen LLC for thereview of its 10-QSBs and \$1,900 for the examination of the Form 10-KSB. In addition, the Company has accrued \$500 each for its various Form 10-QSBs and \$1,000 for this Form 10-KSB in order that the accountant can prepare the applicable working papers and other information to be submitted to the auditors for their review of the Form 10-QSBs and 10-KSBs.

ii The Company has incurred certain expenses during the year for filing its various Forms 10-QSB and 10-KSB with the SEC. The normal expense for filing the Forms 10-QSB is \$200 per quarter and the Form 10-KSB is \$300.

iii. In February 2003, the Company undertook an exploration program on the Standard mineral claim for four days. The above noted expenses include the cost of two individuals, room and board and transportation by snowmobile to the Standard claims. In addition, the amount shown includes filing the assessment work with the Gold Commissions office at the Ministry of Mines and Energy for the Province of British Columbia. This maintained the claim in good standing until February 24, 2004.

iv. The Company has paid annual filing fees to The Company Corporation of \$175 and other fees to reinstate the Company to good standing of \$288. Franchise taxes were paid by the Company to the State of Delaware in the amount of \$106 for 2002 and \$59 for 2001. The difference between the two years was due to interest and penalties charged in 2002.

v. The Company does not compensate its directors for the service they perform for the Company since, at the present time, it does not have adequate funds to do so. Nevertheless, management realizes that it should give recognition to the services performed by the directors and officers and therefore has accrued \$200 per month. This amount has been expensed in the current period with the offsetting credit being allocated to "Capital in Excess of Par Value" on the balance sheet. The Company will not, in the future, be responsible for paying either cash or shares in settling this accrual.

vi. The Company does not incur any rental expense since it used the personal residence of its President. Similar to management fees, rent expense should be reflected as an operating expense. Therefore, the Company has accrued \$100 per month as an expense with an offsetting credit to "Capital in Excess of Par Value".

vii. The Company does not have its own telephone number but uses the telephone number of its President. Similar to management fees and rent, the Company accrues an amount of \$50 per month to represent the charges for telephone with an offsetting entry to "Capital in Excess of Par Value".

viii. During the period, the Company received its annual billing from Nevada Agency & Trust Company for acting as transfer agent for the year in the amount of \$1,200. In addition, the Company has accrued certain late charges of interest totaling \$629.

The Company estimates the following expenses will be required during the next twelve months to meet its obligations:

<TABLE>
<CAPTION>

Expenditures		Requirements For Twelve Months	Current Accounts Payable	Required Funds for Twelve Months
<S>	<C>	<C>	<C>	<C>
Accounting and audit	1	\$ 6,200	\$ 15,100	\$ 21,300
Bank charges		80	-	80
Edgar filing fees	2	900	1,900	2,800
Exploration expense	3	2,800	1,271	4,071
Filing fees and franchise taxes	4	275	-	275
Office	5	200	424	624
Transfer agent's fees	6	1,900	4,559	6,459
		-----	-----	-----
Estimated expenses		\$ 12,355	\$ 23,254	\$ 35,609
		=====	=====	=====

</TABLE>

No recognition has been given to management fees, rent or telephone since, at the present time, these expenses are not cash oriented.

- Accounting and auditing expense has been projected as follows:

<TABLE>
<CAPTION>

Filings	Accountant	Auditors	Total
<S>	<C>	<C>	<C>
Form 10-QSB - Nov 30, 2003	\$ 600	\$ 500	\$ 1,100
Form 10-QSB - Feb 28, 2004.	600	500	1,100
Form 10-QSB - May 31, 2004.	600	500	1,100
Form 10-KSB - Aug 31, 2004.	1,000	1,900	2,900
	-----	-----	-----
	\$ 2,800	\$ 3,400	\$ 6,200
	=====	=====	=====

</TABLE>

- Edgar filing fees comprise the cost of filing the various Forms 10-KSB

and 10-QSB on Edgar. It is estimated, based on past charges, that the cost for each of the Form 10-QSBs will be \$200 whereas the cost of filing the 10-KSB will be \$300.

3. To maintain the Standard claim in good standing the Company will incur a cost of Cdn \$200 per unit. The number of units comprising the Standard claim is 18 and therefore, the minimum cost will be \$3,600 Cdn or \$2,680 US. The Company will not pay the Ministry of Mines and Energy cash-in -lieu instead of performing assessment but will undertake some exploration program in order to maintain the claims in good standing. In addition, the Company will have to incur the cost of \$120 to record the work performed which has been accrued in the above figure.

4. Filing fees for the Company as a registered agent are \$175 per year. Franchise taxes paid to the State of Delaware are \$50 plus a late filing charge of \$50.

5. Relates to photocopying and faxing based on prior year's actual charges.

6. Each year the Company is charges a fee of \$1,200 by its transfer agent to act on its behalf. In addition, there will be interest accrued on the outstanding balance of approximately \$700.

Standard will have to raise funds to settle these outstanding liabilities if it wishes to continue to operate in the future.

Standard does not expect to purchase or sell any plant or significant equipment during the next year.

Standard does not expect any significant changes in the number of employees.

ITEM 7. FINANCIAL STATEMENTS

The financial statements of Standard are included following the signature page to this Form 10-KSB.

-18-

ITEM 8. CHANGES IN AND DISAGREEMENT WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

From inception to date, Standard's principal accountant is Seller and Andersen, L.L.C. of Salt Lake City, Utah. The firm's report for the period from inception to August 31, 2003 did not contain any adverse opinion or disclaimer, nor were there any disagreements between management and Standard's principal accountants.

ITEM 8A - CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

Standard's Chief Executive Officer and it Chief Financial Officer, after evaluating the effectiveness of Standard's controls and procedures (as defined in the Securities Exchange Act of 1934 Rules 13a 14(c) and 15d 14 (c) as of the date within 90 days of the filing of this annual report on Form 10-KSB (the "Evaluation Date"), have concluded that as of the Evaluation Date, Stanard's disclosure controls and procedures were adequate and effective to ensure that material information relating to it would be made known to it by others, particularly during the period in which this annual report on Form 10-KSB was being prepared.

(b) Changes in Internal Controls

There were no significant changes in Standard's internal controls or in other factors that could significantly affect Standard's disclosure controls and procedures subsequent to the Evaluation Date, nor any significant deficiencies or material weaknesses in such disclosure controls and procedures requiring corrective actions.

PART 111

ITEM 9. DIRECTORS AND EXECUTIVE OFFICERS, PROMOTERS, AND CONTROL PERSONS;
COMPLIANCE WITH SECTION 16 (A) OF THE EXCHANGE ACT

The following table sets forth as of August 31, 2003, the name, age, and position of each executive officers and director and the term of office of each director of Standard.

<TABLE>
<CAPTION>

Name	Age	Position Held	Term as Director Since
<S>	<C>	<C>	<C>
Del Thachuk. . .	67	President and Director	1998
Maryanne Thachuk	67	Secretary Treasurer	-

</TABLE>

The director of Standard serves for a term of one year and until his successor is elected at Standard's Annual Shareholders' Meeting and is qualified, subject to removal by Standard's shareholders. Each officer serves, at the pleasure of the Board of Directors, for a term of one year and until his successor is elected at a meeting of the Board of Directors and is qualified.

Set forth below is certain biographical information regarding each of Standard's executive officers and directors.

DEL THACHUK has been the President and a Director of Standard since its inception. Mr. Thachuk graduated from Victoria Composite High School in Edmonton, Alberta before spending nine months articling as a chartered accountant student. Subsequently, Mr. Thachuk worked for two years for the City of Edmonton as a surveyor before entering professional football for four years. He was a player for London Lords in London, Ontario and then was hired by the Edmonton Eskimos. From 1962 to 1969, Mr. Thachuk was owner and president of Civic Tire & Battery Ltd. located in Olds, Alberta. His company owned three tire shops and was in partnership with an additional two. Subsequent to the sale of his company he became a contractor for a short period of time during which time he build and sold five houses and approximately thirty pre-fab homes. In 1971, Mr. Thachuk commenced mining a placer gold property he owned in Atlin, British Columbia. During the fifteen years he mined his placer property he extracted in excess of 30,000 ounces of gold. With the sale of the placer property, Mr. Thachuk, over the next five years, entered into various mining ventures in

Nevada, Washington State and British Columbia. During this same period of time, Mr. Thachuk was president of Red Fox Minerals Ltd., a company listed on the former Vancouver Stock Exchange. In 1991, he became part owner and general manager for Koben Sand & Gravel which employed 36 employees and in its third year of operations had in excess of CDN \$6,000,000 in sales. In 1994, Mr. Thachuk became a consultant for various companies until 1997 when he incorporated and became president of Mine A Max Corporation (renamed to Peabody's Coffee Inc.), a company trading on the OTC Bulletin Board in United States. Recently he formed a Nevada company named Info-Pro Marketing Inc. specializing in the distribution of educational books.

MARYANNE THACHUK has been Secretary Treasurer of Standard since its inception. She graduated from Jasper Place Sr. High in Edmonton in 1954 and then obtained a Certified Secretarial Diploma from McTavish Business College. From 1956 to 1960, Maryanne worked for CJCA Broadcasting Station in Edmonton reporting on court cases, sport related events and other news issues. She was the assistant

-20-

to the Sports and News Director. In 1960, she moved to Vancouver and was employed as Private Secretary to the President of Dueck Motors. In 1962, she moved back to Alberta where she was trained as an In-Service Social Worker with the Alberta Government Department of Public & Child Welfare. In 1964 Maryanne moved back to the Vancouver as the Private Secretary of the President of Lindal Cedar Homes. From 1965 to 1988 she worked part time for the President of Delmor Enterprises before becoming one of its directors. In 1988, she became the Personal Secretary to the Board Chairman of the Culinary Foods Division for Canadian Airline. Since 1990, she has been working for the B.C. Government Department of Education (Surrey School District #36) where she has received specialized training in Finance & Administration. In 2001, she retired.

Del or Maryanne Thachuk are not directors of another company registered under the Securities and Exchange Act of 1934 other than Del who was a director and officer of Mine A Max Corporation until May 31, 1999.

Del Thachuk, the President and Director, and Maryanne Thachuk, the Secretary Treasurer, are married to one another. The two, however, are not related to any person under consideration for nomination as a director or appointment as an executive officer.

To the knowledge of management, during the past five years, no present or former director, executive officer or person nominated to become a director or an executive officer of Standard:

- (1) filed a petition under the federal bankruptcy laws or any state insolvency law, nor had a receiver, fiscal agent or similar officer appointed by the court for the business or property of such person, or any partnership in which he was a general partner at or within two years before the time of such filings;
- (2) was convicted in a criminal proceeding or named subject of a pending criminal proceeding (excluding traffic violations and other minor offenses);
- (3) was the subject of any order, judgment or decree, not subsequently reversed, suspended or vacated, of any court of competent jurisdiction, permanently or temporarily enjoining him from or otherwise limiting, the following activities:
 - (i) acting as a futures commission merchant, introducing broker, commodity trading advisor, commodity pool operator, floor broker, leverage transaction merchant, associated person of any of the foregoing, or as an investment advisor, underwriter, broker or dealer in securities, or as an affiliate person, director or employee of any investment company, or engaging in or continuing any conduct or practice in connection with such activity;
 - (ii) engaging in any type of business practice; or
 - (iii) engaging in any activities in connection with the purchase or sale

of any security or commodity or in connection with any violation of federal or state securities laws or federal commodities laws;

- (4) was the subject of any order, judgment, or decree, not subsequently reversed, suspended, or vacated, of any federal or state authority barring, suspending or otherwise limiting for more than 60 days the right of such person to engage in any activity described above under this Item, or to be associated with persons engaged in any such activities;
- (5) was found by a court of competent jurisdiction in a civil action or by the Securities and Exchange Commission to have violated any federal or state securities law, and the judgment in such civil action or finding by the Securities and Exchange Commission has not been subsequently reversed, suspended, or vacated.

-21-

- (6) was found by a court of competent jurisdiction in a civil action or by the Commodity Futures Trading Commission to have violated any federal commodities law, and the judgment in such civil action or finding by the Commodity Futures Trading Commission has not been subsequently reversed, suspended or vacated.

COMPLIANCE WITH SECTION 16 (A) OF THE EXCHANGE ACT

Standard knows of no director, officer, beneficial owner of more than ten percent of any class of equity securities of Standard registered pursuant to Section 12 ("Reporting Person") that failed to file any reports required to be furnished pursuant to Section 16(a). Other than those disclosed below, Standard knows of no Reporting Person that failed to file the required reports during the most recent fiscal year.

The following table sets forth as at August 31, 2003, the name and position of each Reporting Person that filed any reports required pursuant to Section 16 (a) during the most recent fiscal year.

Name	Position	Form	Report to be Filed
Del Thachuk	President and Director	3	September 11, 2002
		5	November 17, 2003
Maryanne Thachuk	Secretary Treasurer	3	November 21, 2003

ITEM 10. EXECUTIVE COMPENSATION

CASH COMPENSATION

There was no cash compensation paid to any director or executive officer of Standard during the fiscal year ended August 31, 2003.

The following table sets forth compensation paid or accrued by Standard during the fiscal years ended August 31, 2000 to 2003 to Standard's President, Directors and Secretary Treasurer.

SUMMARY COMPENSATION TABLE (2000-2003)

Annual Compensation	Long Term Compensation (US Dollars)	
	Awards	Payouts

-22-

There has been no compensation given to either of the Director or Officers during the periods ended August 31, 2000 to 2003. There are no stock options outstanding as at August 31, 2003, but it is contemplated that the Company may issue stock options in the future to officers, directors, advisers and future employees.

BONUSES AND DEFERRED COMPENSATION

None

COMPENSATION PURSUANT TO PLANS

None

PENSION TABLE

None

OTHER COMPENSATION

The director has not received any compensation for the time he has devoted to Standard. Nevertheless, Standard does give recognition to the time spent by accruing as an expense each month a charge of \$200 per month as management fees with an offsetting credit to Capital in excess of par value. The amount so accrued with not be pay in either cash or shares to the director in the future.

COMPENSATION OF DIRECTORS

None

TERMINATION OF EMPLOYMENT

There are no compensatory plans or arrangements, including payments to be received from Standard, with respect to any person named in Cash Consideration set out above which would in any way result in payments to any such person because of his resignation, retirement, or other termination of such person's employment with Standard or its subsidiaries, or any change in control of Standard, or a change in the person's responsibilities following a change in control of Standard.

ITEM 11. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

The following table sets forth as at August 31, 2003, the name and address and the number of shares of Standard's common stock, with a par value of \$0.001 per share, held of record or beneficially by each person who held of record, or was known by Standard to own beneficially, more than 5% of the issued and

outstanding shares of Standard's common stock, and the name and shareholdings of each director and of all officers and directors as a group.

- (1) All shares owned directly are owned beneficially and of record, and such shareholder has sole voting, investment and dispositive power, unless otherwise noted.
- (2) These shares have been sold but the certificate has not been changed to denote the new owner.
- (3) Under Rule 13-d under the Exchange Act, shares not outstanding but subject to options, warrants, rights, conversion privileges pursuant to which such shares may be acquired in the next 60 days are deemed to be outstanding for the purpose of computing the percentage of outstanding shares owned by the persons having such rights, but are not deemed outstanding for the purpose of computing the percentage for such other persons.
 - (i) This stock is restricted since it was issued in compliance with the exemption from registration provided by Section 4(2) of the Securities Act of 1933, as amended. After this stock has been held for one year, Mr. Thachuk could sell 1% of the outstanding stock in Standard every three months. Therefore, this stock can be sold after the expiration of one year in compliance with the provisions of Rule 144. There is "stock transfer" instructions placed against this certificate and a legend has been imprinted on the stock certificate itself.
 - (ii) Michael Thachuk is the son of the President of Standard. He is married and lives in his own home.

ITEM 12. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

TRANSACTIONS WITH MANAGEMENT AND OTHERS

Except as indicated below, there were no material transactions, or series of similar transactions, since inception of Standard and during its current fiscal period, or any currently proposed transactions, or series of similar transactions, to which Standard was or is to be a party, in which the amount involved exceeds \$60,000, and in which any director or executive officer, or any security holder who is known by Standard to own of record or beneficially more than 5% of any class of Standard's common stock, or any member of the immediate family of any of the foregoing persons, has an interest.

INDEBTEDNESS OF MANAGEMENT

There were no material transactions, or series of similar transactions, since the beginning of Standard's last fiscal year, or any currently proposed transactions, or series of similar transactions, to which Standard was or is to

-25-

be a part, in which the amount involved exceeded \$60,000 and in which any director or executive officer, or any security holder who is known to Standard to own of record or beneficially more than 5% of the common shares of Standard's capital stock, or any member of the immediate family of any of the foregoing

persons, has an interest.

TRANSACTIONS WITH PROMOTERS

Standard does not have promoters and has no transactions with any promoters.

(a) (2) FINANCIAL STATEMENT SCHEDULES

The following financial statement schedules are included as part of this report:

None.

(a) (3) EXHIBITS

The following exhibits are included as part of this report by reference:

1. Certificate of Incorporation, Articles of Incorporation and By-laws
 - 1.1 Certificate of Incorporation (incorporated by reference from Standard's Registration Statement on Form 10-SB filed on December 6, 1999)
 - 1.2 Articles of Incorporation (incorporated by reference from Standard's Registration Statement on Form 10-SB filed on December 6, 1999)
 - 1.3 By-laws (incorporated by reference from Standard's Registration Statement on Form 10-SB filed on December 6, 1999)
- 99.1 Certificate Pursuant to Section 301(a) of the Sarbanes-Oxley Act of 2002 (Chief Executive Officer)

- 99.2 Certification of the President Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
 - 99.3 Certificate Pursuant to Section 301(a) of the Sarbanes-Oxley Act of 2002 (Chief Financial Officer)
 - 99.1 Certification of the Secretary Treasurer Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
 - (b) Reports on Form 8-K
- None

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

(1) Audit Fees

The aggregate fees billed by the independent accountants for the last two fiscal years for professional services for the audit of Standard's annual financial statements and the review included in Standard's Form 10-QSB and services that are normally provided by the accountants in connection with statutory and regulatory filings or engagements for those fiscal years were \$6,800.

(2) Audit-Related Fees

The aggregate fees billed in each of the last two fiscal years for assurance and related services by the principal accountants that are reasonably related to the performance of the audit or review of Standard's financial statements and are not reported under Item 9 (e)(1) of Schedule 14A was NIL.

(3) Tax Fees

The aggregate fees billed in each of the last two fiscal years for professional services rendered by the principal accountants for tax compliance, tax advise, and tax planning was \$200.

(4) All Other Fees

During the last two fiscal years there were no other fees charged by the principal accountants other than those disclosed in (1) and (2) above.

(5) Audit Committee's Pre-approval Policies

At the present time, there are not sufficient directors, officers and employees involved with Standard to make any pre-approval policies meaningful. Once Standard has elected more directors and appointed directors and non-directors to the Audit Committee it will have meetings and function in a meaningful manner.

(6) Audit hours incurred

The principal accountants did not spend greater than 50 percent of the hours spent on the accounting by Standard's internal accountant.

In accordance with Section 13 or 15(d) of the Exchange Act, the registrant caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

We have audited the accompanying balance sheet of Standard Capital Corporation (pre- exploration stage company) at August 31, 2003, and the statement of operations, stockholders' equity, and cash flows for the years ended August 31, 2003 and 2002. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes assessing the accounting principles used and significant estimates made by management as well as evaluating the overall balance sheet presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Standard Capital Corporation at August 31, 2003, and the results of operations, and cash flows for the years ended August 31, 2003 and 2002 and the period September 24, 1998 (date of inception) to August 31, 2003, in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. The Company will need additional working capital to service its debt and for its planned activity, which raises substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are described in the notes to the financial statements. These financial statements do not include any adjustments that might result from the outcome of this uncertainty.

STANDARD CAPITAL CORPORATION
(Pre-Exploration Stage Company)

NOTES TO FINANCIAL STATEMENTS

August 31, 2003

1. ORGANIZATION

The Company was incorporated under the laws of the State of Delaware on September 24, 1998 with the authorized common stock of 25,000,000 shares at \$0.001 par value.

The Company was organized for the purpose of acquiring and developing mineral properties. At the report date mineral claims, with unknown reserves, had been acquired. The Company has not established the existence of a commercially minable ore deposit and therefore has not reached the development stage and is considered to be in the exploration stage (see note 3).

The Company has completed a private placement offerings of 1,295,000 shares of its capital stock for \$3,050.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Accounting Methods

The Company recognizes income and expenses based on the accrual method of accounting.

Dividend Policy

The Company has not yet adopted a policy regarding payment of dividends.

Income Taxes

The Company utilizes the liability method of accounting for income taxes. Under the liability method deferred tax assets and liabilities are determined based on differences between financial reporting and the tax bases of the assets and liabilities and are measured using the enacted tax rates and laws that will be in effect, when the differences are expected to be reversed. An allowance against deferred tax assets is recorded, when it is more likely than not, that such tax benefits will not be realized.

On August 31, 2003, the Company had a net operating loss carry forward of \$68,104. The tax benefit of approximately \$20,000 from the loss carry forward has been fully offset by a valuation reserve because the use of the future tax benefit is doubtful since the Company has no operations. The loss carry forward will expire starting in 2014 through 2023.

Statement of Cash Flows

For the purposes of the statement of cash flows, the Company considers all highly liquid investments with a maturity of three months or less to be cash equivalents.

NOTES TO FINANCIAL STATEMENTS

August 31, 2003

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - CONTINUED

Basic and Diluted Net Income (loss) Per Share

Basic net income (loss) per share amounts are computed based on the weighted average number of shares actually outstanding. Diluted net income (loss) per share amounts are computed using the weighted average number of common and common equivalent shares outstanding as if shares had been issued on the exercise of any common share rights unless the exercise becomes antidilutive and then only the basic per share amounts are shown in the report.

Unproven Mineral Claim Costs

Costs of acquisition, exploration, carrying and retaining unproven properties are expensed as incurred.

Revenue Recognition

Revenue is recognized on the sale and transfer of goods or completion of service.

Advertising and Market Development

The company expenses advertising and market development costs as incurred.

Financial and Concentrations Risk

The Company does not have any concentration or related financial credit risk.

Environmental Requirements

At the report date environmental requirements related to the mineral claim acquired are unknown and therefore an estimate of any future cost cannot be made.

Estimates and Assumptions

Management uses estimates and assumptions in preparing financial statements in accordance with accounting principles accepted in the United States of America. Those estimates and assumptions affect the reported amounts of the assets and liabilities, the disclosure of contingent assets and liabilities, and the reported revenues and expenses. Actual results could vary from the estimates that were assumed in preparing these financial statements.

-36-

STANDARD CAPITAL CORPORATION
(Pre-Exploration Stage Company)

NOTES TO FINANCIAL STATEMENTS

August 31, 2003

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - CONTINUED

Financial Instruments

The carrying amounts of financial instruments, including cash and accounts payable, are considered by management to be their estimated fair value.

Recent Accounting Pronouncements

The Company does not expect that the adoption of other recent accounting pronouncements will have a material impact on its financial statements.

3. ACQUISITION OF MINING CLAIMS

The Company acquired one 18 unit metric claim known as the Standard claim located within the Bridge River gold camp near the town of Gold Bridge, 160 kilometres north of Vancouver, British Columbia with an expiration date of February 23, 2004. The claims may be extended for one year by the payment of \$1,980 Cdn or the completion of work on the property of \$3,600 Cdn plus a filing fee of \$180 Cdn.

The claims have not been proven to have commercially recoverable reserves and therefore the acquisition and exploration costs have been expensed.

4. SIGNIFICANT TRANSACTIONS WITH RELATED PARTIES

Officers-directors and their families have acquired 15% of the common capital stock issued, and have made no interest, demand loans of \$20,931 and have made contributions to capital of \$21,000 to the Company in the form of expenses paid for the Company.

5. GOING CONCERN

The Company will need additional working capital to service its debt and to develop the mineral claims acquired, which raises substantial doubt about its ability to continue as a going concern. Continuation of the Company as a going concern is dependent upon obtaining additional working capital and the management of the Company has developed a strategy, which it believes will accomplish this objective through additional equity funding, and long term financing, which will enable the Company to operate for the coming year.

Exhibit 99.1

CERTIFICATION PURSUANT TO
SECTION 301 (A) OF THE SARBANES-OXLEY ACT OF 2002

I, E. Del Thachuk, certify that:

1. I have received this annual report of Form 10-KSB for the year ended August 31, 2003 of Standard Capital Corporation, the registrant;
2. Based on my knowledge, this annual report does not contain any untrue statements of a material fact or omit to state a material fact necessary to make the statement made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this annual report.
3. Based on my knowledge, the financial statements, other than financial information included in this annual report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this annual report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:

- a. designed such disclosure controls and procedures to ensure that material information relating to the registrant is made know to us by others within those entities, particularly during the period in which this annual report is being prepared;
 - b. evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this annual report (the "Evaluation Date"); and
 - c. presented in this annual report our conclusion about effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors:
- a. all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal control; and
 - b. any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls;
6. The registrant's other certifying officer and I have indicated in this annual report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regards to significant deficiencies and material weaknesses.
